REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record includes the combination of a swab comprising a handle, cleaning tip, cleaning head formed from a plurality of extruded, compressed fibers that are formed into a substantially rigid, elongated cleaning head, with the cleaning head being secured to the handle at the cleaning head, and the handle having a bore therein at the securing region with the cleaning tip being snugly fit within the handle bore. USPN RE 16,869 to Goldman does not teach nor suggest that the handle has a bore therein at the securing region or a cleaning tip being snugly fit within the handle bore. Goldman further does not teach that the handle is a hollow member defining a central bore. It would not have been obvious to combine the nail brush of Goldman with the optical cleaner that Varma discloses, as there is not sufficient motivation to combine the device of Goldman with Varma. One would not change or modify a nail brush, such as Goldman's, to be hollow or of another shape or have a bore therein since it would teach away from the function that the shape and rigidity that the nail brush requires for use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
